PROJECTS

Web Developer Portfolio — *Compilation of my Development Projects*

As a web developer, I have undertaken a range of projects that demonstrate my technical expertise and creativity. I have designed and developed responsive websites and web applications using modern front-end frameworks, such as ReactJS, and back-end technologies, like NodeJS and SQL. My projects have involved integrating APIs and databases, implementing security features, optimizing website performance, and implementing user-friendly interfaces. I have also collaborated with team members to develop custom solutions tailored to meet specific client needs, and ensured that all projects are delivered on time and to the highest quality standards.
